C

CA-DATACOM/DB databases 8
  access by row number 113
  character data types 11
  compound fields 10
  data types 10
  data views 8
  database names 9
  deleting records 50, 55
  delimiter, changing 116
  direct access 113
  elements 10
  execution environments 13
  extracting data to SAS data files 21
  fast-loading procedure 118
  indexing 12
  inserting records 50, 55
  keys 10
  loading mode 116
  mask character 116
  Master Keys 10, 50
  Multi-User execution 13
  Native Keys 10
  nils 11
  numeric data types 11
  retrieval processing 107
  security features 13
  simple fields 10
  Single User execution 13
  sorting 12
  specifying 73, 116
  status, specifying 74, 116
  version, specifying 74, 116
CA-DATADICTIONARY databases 8
  data validation 122
  example data 126
  online versus batch 8
  passwords 116
  updates, and descriptor files 110
  userids 91, 116, 119
character data types 11
CHART procedure 26
charting data 26
columns, DBMS 74
  dropping 74
  formats, changing 76
  informats, changing 77
  resetting to default values 85
columns, descriptor 75, 78
columns, SAS 24
  formats, specifying 70
  names, changing 83
  names, specifying 70
  naming conventions 70
  renaming 85
  reviewing 24
compound fields 10
concurrent tasking 114, 116
CONTENT statement 71
CONTENT subcommand 83
CREATE statement 72
CUSTOMERS table 132

D

data fields, listing 79
data selection 12
  multiple sources 31
  OCCURS statement 81
  one source 12
  SELECT statement 87
  SQL procedure 33
  WHERE statement 12, 32
  WHERE statement, $HEX format fields 94
  WHERE statement, character values 94
  WHERE statement, date values 94
  WHERE statement, examples 93
  WHERE statement, expressions 93
  WHERE statement, guidelines for 96
  WHERE statement, masking values 95
  WHERE statement, multi-field keys 95
  WHERE statement, syntax 92
  WHERE statement, values mismatched to fields 95
data set options 117
data types 10
data validation 122
data views 8
data, browsing 46
  FSBROWSE procedure 46
  FSEDIT procedure 46
  FSVIEW procedure 47
  SELECT statement 52
  selecting data for 48
  SQL procedure 52
  WHERE clauses 48
data, updating
  backing out changes 52
  effects on descriptor files 69
  FSEDIT procedure 46
  FSVIEW procedure 48
  partial updates 52
  selecting data for 48
  SQL procedure 52
  UNDO_POLICY option 52
  update processing 109
  UPDATE statement 54
  WHERE clauses 48
database names 9
DATABASE statement 73
DATASETS procedure 67
dates
  formats, specifying 71, 94
  length, specifying 71
